## Job Card

Date:

Vessel	Job Type	Start Time	Finish Time
	<i>Washes</i>		

Tasks	Action	Completed
<b>Wash and remove covers</b>	<i>Soap wash covers whilst on vessel, chammy dry and stow in safe place (away from waters edge or wind)</i>	
<b>Soap wash hard top or bimini</b>	<i>Set up harness and safely stand on hard top or vantage point to wash bimini. Ensure underside of domes and radar domes have been scrubbed (all undersides of instruments and fittings that can be seen from below)</i>	
<b>Soap wash clears or windows/windcreens</b>	<i>Ensure clears are washed using softwash tool or mitt. Ensure the whole clears section has been passed over with sort wash tool (if windy or hot work small sections to ensure soap doesn't dry on clears/glass as this will leave bad stewaking)</i>	
<b>Soap wash brows, side windows and superstructure</b>	<i>When washing the brow/superstructure and side windows ensure to soap between superstructure overhang and windows (salt builds up in these areas, the salt cant be seen from the outside but is very visible from the inside)</i>	
<b>Move or lift Kayaks, Lilypads and all yacht toys off deck</b>	<i>When washing forward decks make sure all yacht toys have been lifted off the deck and soap</i>

## Job Card

	<i>washed underneath (if toys are salty, soap wash and notify us in comments)</i>	
<b>Lift/open all deck hatches</b>	<i>Open all hatches and wash out gutters, drains and inside of hatch lids (if scrubbing is required, use magic sponge or scotch brite)</i>	
<b>Soap wash Stainless bow rails and fittings</b>	<i>Using a mitt and soap, wash hand rails and fittings (Ensure to wash underside or rails and inward side of fittings as salt usually hides in these areas)</i>	
<b>Soap wash/Bleach non-slip</b>	<i>When scrubbing non slip use orange broom head (hard bristle) and bleach (blue bottle) carefully scrub nonslip and keep all surrounding areas WET to prevent damaging covers etc</i>	
<b>Soap wash Bulwarks, in and out</b>	<i>Soap wash bulwarks using soft bristle brush. Be sure to check all gutters and inside bulwarks for grime build up. Usually black!</i>	
<b>Soap wash sunroof gutters</b>	<i>Open sunroof and inspect gutters. Use a magic sponge to clean grime and chammy dry. (Note face of sunroof will have grime and mould)</i>	
<b>Chammy vessel</b>	<i>Chammy clears, glass and stainless steel using an absorbent chammy first following by a finishing chammy to ensure no water drops are left behind</i>	
<b>Final walk around</b>	<i>Once all above tasks are complete, walk around vessel with a finishing chamois and inspect vessel for any missed spots or water drips</i>
